

OEM radar measuring device, for aggressive media level measurement

Type 8136 can be combined with...

Type 8793

Process controller

Type 2103

Diaphragm valve

Type 8802-GD

Element control valve system

Type 8644

Valve islands

PLC

- For level measurement up to 20 m, 4... 20 mA/Hart - 2 wires
- Adjustable via Display, key operation or PC-Tool with DTM
- ATEX approvals Ex
- Insensitive to variations of temperature, pressure, medium data of the product and gas layers

The Type 8136 is a non-contact radar level measuring device for continuous level measurement.

The unit is available in two versions:

- with encapsulated horn antenna particularly suitable for level measurement of aggressive liquids in small vessels.

- with plastic horn antenna particularly suitable for measurement in open flumes or gauge measurement in waters.

General data

Materials

Housing / Cover	PBT, Stainless steel 316L / PC
Seal ring / Ground terminal	NBR / Stainless steel 316Ti/316L (1.4571/1.4435)
Mounting strap / Fixing screws	Stainless steel 304 (1.4301) / Stainless steel 316L (1.4435)
Wetted parts	
Encapsulated horn antenna version	
Process connection / Antenna / Seal	PVDF / PVDF (completely encapsulated) / FKM
Plastic horn antenna version	
Process connection	Stainless steel 316L (1.4435)
Horn antenna / Focus lens	PBT-GF30 / PP

Display*

LCD in full dot matrix (option)

Process connection

Thread G 1½" or NPT 1½" (Encapsulated horn antenna version)
Mounting strap 170 mm (Plastic horn antenna version)

Max. torque mounting boss

4 Nm (mounting screws - strap on the sensor housing)

Electrical connection

Cable glands M20 x 1.5

Measuring value

Distance between process connection and product surface

Min. dielectric figure

$\epsilon_r > 1.6$

Dead zone

50 mm¹⁾

Measuring range

0.05 to 10 m (Encapsulated horn antenna version)
0 to 20 m (Plastic horn antenna version)

Process temperature

-40 to +80°C (-40 to 176°F)

Vessel pressure

-1 to 3 bar (-14.51 to 43.53 PSI) (-100 to 300 kPa)

Vibration resistance

Mechanical vibrations with 4 g and 5... 100 Hz

Temperature coefficient

0.03%/10K (Average temperature coefficient of the zero signal - temperature error)

Resolution

max. 1 mm

Frequency

K-band (26 GHz technology)

Interval

approx. 1 s

Beam angle at 3 dB

22° (Encapsulated horn antenna vers.) - 10° (Plastic horn antenna vers.)

Adjustment time

> 1 s (dependent on the parameter adjustment)

Accuracy

± 2 mm (see diagram)

* to be ordered separately

¹⁾ Encapsulated horn antenna version. In products with low dielectric value up to 50 cm.

Electrical data	
Operating voltage	14 - 36 V DC or 14 - 30 V DC (Ex ia instrument)
Permissible residual ripple	< 100 Hz: $U_{ss} < 1\text{ V}$ 100 Hz... 10 kHz: $U_{ss} < 10\text{ mV}$
Output signal	4... 20 mA/HART
Resolution	1.6 μA
Fault signal	current output unchanged 20.5 mA, 22 mA or < 3.6 mA (selectable)
Current limitation	22 mA
Load	see load diagram
Damping (63% of the input variable)	0... 999 s, adjustable
Environment	
Ambient temperature	-40 to +80°C (-40 to 176°F) (operation and storage)
Relative humidity	80% max; without condensation
Standards and approvals	
Protection	IP66/IP67 with M20 x 1.5 gland mounted and tightened
Overvoltage category	III
Protection class	II
Standard	
EMC	EN61326
Security	EN61010-1
NAMUR	NE 21; NE 43
Approvals	ATEX ²⁾ : EN60079-0; EN60079-11; EN60079-26
Specifications Ex	
⊕ - Protection	Categories 1/2G or 2G
⊕ - Certification	Ex ia IIC T6
Conformity specifications²⁾	
Operating voltage U_i	30 V
Short circuit rating I_i	131 mA
Power limitation P_i	983 mW
Ambient temperature	-40 to +55°C (-40 to 131°F) (dependent on categories)
Internal capacity C_i	negligible
Internal inductivity L_i	negligible

2) homologation certificate PTB 08 ATEX 2002X

Load diagram

Target applications

■ Dosing and processing systems

Level measurement:

The radar measuring principle is particularly suitable for continuous level measurement of toxic and corrosive substances. The measurement is non-contacting, i.e. there is no direct contact with the medium.

Due to the very small process connection and the PVDF encapsulated antenna, the 8136 radar level measuring device is ideal for this application.

■ Open flumes

Measurement for heavy demands:

Radar level measuring device like the Type 8136 are also suitable for measurement in open flumes. For wastewater treatment in chemical plants, where wastewater temperatures change drastically or where solvents are contained in the wastewater, the use of radar level measuring device is recommended.

Principle of operation

The radar measuring device consists of an electronic housing, a process connection element, the antenna and a sensor. The antenna emits short radar pulses with a duration of approximately 1 ns to the medium. These pulses are reflected by the medium surface and received by the antenna as echoes. Radar waves travel at the speed of light. The running time of the radar pulses from emission to reception is proportional to the distance and hence to the level. The determined level is converted into an output signal and transmitted as a measured value.

The measuring device can be adjusted with:

- the display/configuration module
- the suitable Bürkert DTM in conjunction with adjustment software according to the FDT/DTM standard, e.g. PACTware™ and PC
- a HART handheld

The entered parameters are generally saved in the measuring device Type 8136. Optionally, parameters may also be uploaded and downloaded with the display/configuration module or save in a file by using PACTware™/DTM

▶ Set up with display/configuration module

The display/configuration module can be inserted into the measuring device and removed again at any time. It is not necessary to interrupt the power supply. The measuring device is adjusted via the four keys of the display/configuration module

▶ Set up with PACTware™/DTM and HART communication

The measuring device can be operated thanks to PACTware™, via HART communication. An interface adapter is necessary for the adjustment with PACTware™. For the setup of the Type 8136, the DTM in the actual version must be used. The basic version of DTM incl. PACTware™ is available as a free-of-charge download from the Internet at www.burkert.com.

Connecting the PC via HART

1. Measuring device 8136
2. HART-USB Modem
3. Resistance 250 Ohms

Necessary components:

- Measuring device 8136
- PC with PACTware™ and suitable Bürkert DTM
- HART-USB Modem
- Resistance approx. 250 Ohms
- Power supply unit
