

Features

- Three double acting pneumatic cylinder design for high power transmission and increase stroke also decrease housing thickness for space-saving design.
- Direct drive synchronized via cam disc for self-centering and high repeatability.
- Through center hole for workpiece feed.
- The housing: high-tensile aluminum and special hard-coated.
- Auto switch with indicator lamp.

Effective holding force

- * With reference to the holding force, under the condition must be considered.
- * Condition: Friction coefficient, great acceleration impact is expected during workplace rotate.
- * It recommended: Select a type of arithmetic holding force that can produce 10 to 20 times for workpiece weight.
